TEMPLATE · UNDERSTANDING USERS

Empathy Map

Empathy mapping visualises what a user says, thinks, does and feels, to build a shared understanding of their needs.

PERSONA AND SITUATION
Who are we looking at, and in which situation?

THINK AND FEEL What do they think about the situation? How do they feel?

SEE What is around them? What is the market like?

HEAR What do friends, the boss or influencers say?

SAY AND DO How are they solving the problem now? What do they actually do?
